

Jenny Ou

Student at Queen Mary University London

Address: London, England, United Kingdom

LinkedIn: <https://uk.linkedin.com/in/jenny-ou-773079217>

- As a Creative Computing student at Queen Mary, London, I bring a dynamic blend of technical skills and a passion for innovation. With a solid foundation in programming, I excel in frontend technologies such as HTML, CSS, Vue, and Bootstrap, creating visually appealing and user-friendly interfaces. On the backend, I am proficient in PHP, Java, JavaScript, and Python (Django), ensuring robust and scalable web applications.
- My expertise extends to game development, where I leverage C++ within Unity to craft engaging and immersive experiences. Rooted in a strong programming theory background encompassing object-oriented principles, data structures, and algorithms, I am well-equipped to tackle complex challenges and implement efficient solutions.
- Driven by an insatiable curiosity, I actively seek internship opportunities across diverse industries, eager to apply my technological acumen to real-world scenarios. My enthusiasm for learning and dedication to an IT career make me a valuable asset to any team. I am not just a coder; I am a proactive problem solver with a keen eye for detail, ready to contribute my skills to innovative projects.

RECOMMENDATIONS

Andy Ou

- It is a great pleasure to have Jenny join our company as an IT intern this summer. During this period, she was mainly responsible for assisting the company in installing and integrating the software for our US Work And Travel program from scratch. Despite joining the team as an intern, her professional performance has drawn the attention of her colleagues. She not only demonstrated a proactive approach to her work but also excelled in departmental coordination, communication with overseas vendor, troubleshooting system issues, and creating user manuals. Jenny did an amazing job, and her help was invaluable. She performed just as well as a full-time professional computer engineer, and we're really grateful for everything she did.

Jou-Pei Fang

- If you have any doubts about Jenny's abilities and professionalism, please do not hesitate to contact me for further insight into her performance.
