Product Manager intern (April-Sep 2023)
Manatal, Thailand
During my 6-month internship I managed my own features throughout their lifecycle, from customer research and design to development, A/B testing and iteration.
I collaborated with cross-functional teams, including design, marketing, and engineering (participating in the scrum ceremonies), and contributed to core product metrics including conversion and retention.

BSc (Eng) Creative Computing (2021 – 2024)
Queen Mary University of London
Currently on my final year, studying towards a bachelor's degree in creative computing. As part of this degree program, I focus on programming fundamentals as well as user centred design practices.

Professional Business English Diploma (2021)
Kaplan Higher Education Institute, Singapore
Completed with High Distinction a diploma in Professional Business English at Kaplan Higher Education Institute in Singapore, improving both my English verbal and written skills.

National Service (2018 – 2021)
IDF, Israel
As an Israeli citizen, I attended the National Service for 3 years as a research analyst. Independently leading the research in my domain, analysing information, and formulating conclusions and recommendations. I presented my findings in written form and verbally for high-ranking officers, working under extreme pressure with high national responsibility.

Achievements

Queen Mary University
Received the Global Excellence Scholarship for my bachelor's degree studies in Queen Mary University of London

National Service
Received an excellence award as a research analyst

FLL Robotics
As the head of research in my FLL (https://bit.ly/3fP0XtD) international robotic competition, received the first national prize and chosen to present our research in the US embassy and at the national TV & Radio stations
